

Raihan Shakeel

Full Stack Developer

Location: Karachi, Pakistan | Phone: +92340 8740717

Email: raihanshakeel58@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

I am a motivated and adaptable Full-Stack Developer with strong problem-solving, creative thinking, and communication abilities. I am a collaborative team member who approaches challenges with a solution-oriented mindset, attention to detail, and a willingness to learn. Committed to continuous professional growth and delivering high-quality work in dynamic development environments.

EDUCATION

University of Turbat | BS, Computer Science

Turbat, Balochistan, Pakistan | Jan 2019 - Dec 2022

CGPA: 2.97 | Percentage: 72.21

SKILLS

Languages: Python, JavaScript, TypeScript, Dart, C#, SQL, Java, C++

Frontend & Mobile: React.js, Next.js, React Native, Flutter, HTML, CSS, Tailwind CSS

Backend: Django, Flask, FastAPI, ASP.NET, MedusaJS

Databases: PostgreSQL, MySQL, MongoDB, SQLite

Data & NLP: NLP, NLTK, spaCy, Beautiful Soup, Selenium

Tools/Services: Git, GitHub, Firebase, Supabase, REST APIs

Spoken Languages:

Balochi, Urdu, English

EXPERIENCES

Full-Stack Developer | Shuhaz Technologies

January, 2026 - Present

As a **Full-Stack Developer** at **Shuhaz Technologies**, I contribute to the ongoing development of the company's digital products by turning business requirements into practical software solutions. Working as part of the development team, I help deliver and improve real-world e-commerce platforms with a focus on reliability, usability, and overall quality.

Responsibilities:

- Develop and maintain web and mobile features across React/[Next.js](#) and React native applications.
- Build and integrate backend functionality and REST APIs using MedusaJS and PostgreSQL.
- Implement authentication, database operations, API integrations, and application business logic.
- Collaborate with UI/UX designers to translate designers and workflows into production-ready interfaces.
- Diagnose and resolve frontend, backend, API, and performance issues across the application stack.
- Write reusable, maintainable Typescript/Javascript code and contribute to ongoing product development.

Projects:

Shuhaz B2B E-Commerce Platform | [React.js](#), [Next.js](#), Typescript, MedusaJS, PostgreSQL

Contributed to the development and maintenance of the company's B2B e-commerce platform, working across frontend and backend functionality, API integrations, and database-driven features.

Live: [Shuhaz.com](#)

Samaan Mobile Application | React Native, Typescript, MedusaJS, PostgreSQL

Contributed to the development of the Samaan mobile application, designing, implementing, and maintaining mobile UI, backend/API integrations, e-commerce functionality,

Google Play: [Samaan.App](#)

Full-Stack Developer(Part Time, Remote) | Global AI Nexus

January, 2025 - Present

As a **Full-Stack Developer** at **Global AI Nexus**, I contribute to the development of scalable and high-performing **web** and **mobile** applications. My role involves working across both **frontend** and **backend** systems, ensuring seamless **integration**, efficient **performance**, and an enhanced user experience through clean and maintainable code.

Responsibilities:

- Collaborating with UI/UX designers to translate wireframes and mockups into functional and visually appealing web or mobile applications
- Following best practices for software development and writing clean, maintainable, and reusable code.
- Implementing robust backend functionalities, including authentication systems, database management, and server-side logic.
- Developing and Integrating Restful APIs to seamlessly connect the backend with the frontend.
- Ensuring high performance and responsiveness of apps by optimizing code and troubleshooting bugs and issues.

Flutter Developer | Freelance

May, 2024 - Present

As a freelance Flutter developer, I specialize in building cross-platform **mobile** applications with seamless backend integration. I have experience working with backend services such as **Firebase** and **Supabase**, as well as frameworks like **Django** and **Flask**. Additionally, I've developed applications using both **Python** and **Flutter**.

Responsibilities:

- Collaborating with UI/UX designers to translate wireframes and mockups into functional and visually appealing Flutter applications
- Following best practices for software development and writing clean, maintainable, and reusable code.
- Implementing robust backend functionalities, including authentication systems, database management, and server-side logic.
- Integrating third-party APIs, including payment gateways and AI Integration.
- Developing and Integrating Restful APIs to seamlessly connect the backend with the mobile applications.
- Ensuring high performance and responsiveness of apps by optimizing code and troubleshooting bugs and issues.

University of Turbat | Final year project

Jan-Dec, 2022

Worked as a Data Engineer and Data Annotator in my final year project **Named Entity Recognition System for Balochi**.

Responsibilities:

- Conducted data cleaning and preprocessing to ensure accuracy and consistency across large datasets.
- Annotated and tagged data with relevant labels to facilitate machine learning model training and evaluation.
- Collaborated with project team members to refine annotation guidelines and ensure high-quality data labeling.
- Identified and resolved inconsistencies and errors in raw data, improving data quality for model performance.
